

The Purpose of This Report

The purpose of this report is to grade the legislative outputs of the US Government in terms of its friendliness and support for the "Black Community". This is done by taking all legislative activity that result in laws or that pass through both branches of the legislative process and have a direct impact on domestic affairs, scoring them, and then using those scores to determine the legislative impact of congress on the "Quality of Black Life", in America. While we lack the manpower to produce an in-depth look at individual members of congress, we can look at the laws passed and gain some insight into individual members of congress as well as providing an in-depth look at the legislative branch as a whole.

This report only looks at the federal legislative branch, we simply do not have the manpower to assess the executive or judicial branches and we lack the manpower to assess local legislative branches.

This report only looks at laws passed or bills that made it through both levels of congress and that have a domestic focus. The reason we do not assess bills that do not become law is because we wanted the numbers to represent a true look at the effectiveness of congress to engage in meaningful political activity with regards to the "Black Community" in America. This was the simplest way to negate empty rhetoric and messaging of bills with no chance of becoming law.

This report looks at all laws instead of a few specific laws because laws work together and it is possible for congress to pass a law that is great for the community while simultaneously passing laws that or bad for the community. This report seeks to put a number on the net effect of congress and its members.

This is the 3rd year we have generated a report and the formula has been changed slightly in some regards to make the impact of enforcement slightly less prominent. The formula otherwise remains unchanged, a law is given a base score in 5 areas based on its impact on the community, and that score is modified by whether or not the law has any teeth.

This report is meant to be used as a part of a toolkit for figuring out if a candidate has earned the "Black Vote". With that in mind, the neutral score is 1.00 which is equated to a D. Anything greater than 1.00 is a step forward, anything less than 1.00 is a step backwards, 1.00 is equated to a continuation of the status quo.

The PACTS Team

The rankings below represent how friendly representatives from the states listed are compared to representatives from other states. It is not meant to suggest that these are the best places for Black People to live or that these states have friendly representatives to the Black Community at all. (1 equals neutral or continuing the status quo. 1<=F, 1>1.99=D, 2>2.99=C, 3>3.99=B, 4>4.99=A, 5>=A+)

In Closing

We hope that this report is useful in determining whether the 116th congress of 2019 has acted in a friendly and progressive manner to the Black Community in America. This information is meant to help voters determine who is worthy of their vote. It is also meant to be a tool used to measure action and activities without the screen of rhetoric or political double speak. This is not a perfect tool and should be used in conjunction with other tools to make an informed opinion. This is also not a complete or finished tool as the depth that we would like to reach are not attainable with our current resources. To support the organization or to assist us in the creation of reports in the future, go to www.pactsinc.org.
